- Well versed in Agile (Scrum and XP)
- Keen on unit testing and continuos integration

Employment History

Software Developer   **Pro!vision, Berlin**   **Apr 2013 – Present**

- Helped complete and refactor the front end of an ageing VW project, using a custom MVC framework.
- Worked with Adobe CQ5 CMS and Java driven, continuos integration environment

Senior Web Developer   **AKQA, Berlin**   **Oct 2010 – Apr 2013**

- Optimized HTML5 app for iPad taking advantage of hardware accelerated CSS3 transitions and device storage
- Built relationship with Volkswagen while working onsite, introduced Agile in the early phases of the project
- Learnt how to extend the Liferay Portal to integrate front end code, and trained the London team
- Championed JS unit testing (JSTestDriver, Sinon, Jasmine, Buster.js) within the agency, and extended CI to JS

Developer / Manager   **Freelance, London**   **Jul 2007 – Feb 2010**

- Created an extensible framework to allow TheTeam to create JS / Canvas widgets for Logica intranet
- Created PHP app to feed O2 Academies timetables from SOAP sources onto banners built with MooTools
- Managed teams, both in-house and external, developing multi-faced campaigns for E.on and Cadbury
- Designed and developed tools to allow ASOS marketing team to publish content to social networks

Technical Manager   **DraftFCB, London**   **Jul 2005 – Jul 2007**

- Set up production workflows, managed development teams, ensured delivery on time and to budget of multi-language campaign sites for Motorola's EMEA market.
- Liaised with analytics dept to create data management app to handle Motorola global user database.
