

Fritz Stelluto, Berlin

Engineering Manager | Software, ML & Data

Mail: info@gotofritz.net | LinkedIn: [linkedin.com/in/gotofritz](https://www.linkedin.com/in/gotofritz) | Site: <https://gotofritz.net>

Hello, I'm Fritz, an Engineering Manager based in Berlin. I currently lead the Data Intelligence team at Trawa, where we build data ingestion pipelines, ETL systems, and the infrastructure powering time series forecasting. We also spearhead adoption of LLMs into internal- and external-facing products.

My role combines hands-on system design with people leadership, including hiring, mentoring, and setting technical direction. With a background spanning full-stack engineering and ML Ops, I focus on building scalable data and ML platforms while enabling teams to deliver reliable, high-impact machine learning solutions aligned with business goals.

Work History

Trawa / ML Engineering Manager, Data Intelligence Team

May 2024 - Present, Berlin

- Designed and led the implementation of a production ML prediction pipeline, including a custom Feature Store, training pipeline, and monitoring infrastructure, enabling the company to save customers 30% on energy costs
- Managed and optimized end-to-end ETL and data ingestion pipelines for large-scale, sensitive time series data, ensuring compliance with data privacy standards
- Led and mentored a team of 6 engineers, including recruiting, performance reviews, and career development
- Defined technical roadmap, set priorities, and ensured alignment with business objectives
- Spearheaded the adoption of LLM-based coding agents and workflows across the company
- Promoted best practices in software engineering, ML Ops, and data governance for regulated datasets

Wayfair / Senior Machine Learning Engineer, Scam Prevention Team

Jan 2022 - Apr 2024, Berlin

- Implemented and maintained Python-based batch ingestion pipelines using Kubeflow. Integrated financial and personally identifiable information (PII) from BigQuery and Neo4j into Vertex AI Feature Store, reducing scam risk from 1.4% to 1.2% of revenue
- Delivered access to model outputs for business stakeholders via robust REST endpoints, ensuring secure handling of sensitive customer data
- Oversaw pipelines for training and deploying classification models with Buildkite on GCP, reducing turnaround time while maintaining data privacy and compliance standards
- Managed Arize and Datadog monitoring pipelines, shifting from reactive responses to proactive issue detection before impacting stakeholders
- Played a pivotal role in a cost reduction initiative that slashed GCP costs by 50%

Advertima / Engineering Manager, Smart Signage Team

Jan 2021 - Dec 2021, Berlin

- Oversaw the Smart Signage team responsible for maintaining and enhancing Advertima's flagship in-store advertising product across 1,200+ edge devices and sensors, managing AWS infrastructure, securing ~CHF1M annual revenue
- Led development of the device management console (Django), the routing service for computer vision outputs (Node.js/NestJS), and Apache Spark jobs providing client reports
- Championed cost reduction initiatives, keeping AWS expenses under tight control

Advertima / Senior Software Engineer, Cashier-less Store Demo

Apr 2020 - Dec 2020, Berlin

- Introduced Agile practices, ensuring successful delivery of the Cashier-less Store Demo, securing CHF15M funding
- Developed critical systems including store gate controls (Node.js), payment integration (Flask), catalog management (Django), and a reinforcement learning system for operator label assignments (Flask + Svelte)

Flaconi / Technical Lead, Jun 2018 - Jun 2019, Berlin

Led the transition from a PHP monolith to Node.js microservices orchestrated by a GraphQL gateway, managed PostgreSQL/Redis data stores and React UIs, and made my first foray into ML by designing, deploying, and maintaining a recommendation system in close collaboration with the data science team.

pro!vision / Senior Software Engineer, Apr 2013 - May 2018, Berlin

Developed internal libraries and user interfaces to support various CMS and R&D projects for prestigious clients including Volkswagen, Adobe, Daimler, Bentley, Aldi, Mini, Siemens

AKQA / Senior Software Engineer, Oct 2010 - Mar 2013, Berlin

Constructed user interfaces across a diverse array of projects for Volkswagen and others

Skills

Engineering Management & Leadership: Team leadership, mentoring, hiring, roadmap planning, stakeholder alignment, Agile delivery

ML & Technical Expertise: Production ML pipelines, recommendation systems, time series predictions, MLOps (Kubeflow, Vertex AI, Kubernetes), Python, SQL, GCP/AWS, LLMs.

Education

University College London / B.Eng Electronic Eng. with Computer Science

Languages

English, Italian (fluent), German (intermediate)
